HEX BOLT

Eliminates fastener recess damage and drill outs

The **ACR® PHILLIPS®** Cruciform Drive System advanced design keeps the driver securely mated to the screw during fastener removal, eliminating recess damage and damage to surrounding areas. The results are securely removed screws every time with lower costs, more productive workers and fewer drill outs.

FEATURES

- + **ACR®** ribs
- + Compatible with common Phillips drivers
- + Slanted rib design in recess
- + Angled recess side walls
- + Phillips Screw Company quality inspections

BENEFITS

- + Improved removal without cam-out
- + Off-angle driving ability
- + Reduces worker fatigue
- + **ACR® PHILLIPS®** cruciform screws can be removed or installed in an emergency with common tools
- + Better rib form in all materials
- + Higher heading speed in manufacturing
- + Acts as a torque limit on installation
- + Assures global system quality and compatibility
