

PHILLIPS SQUARE-DRIV[®] DRIVE SYSTEM

DRIVER SIZES

0-1 THRU 3-3

SCREW SIZES

M3 (#4) THRU M6 (1/4 IN)

APPLICATIONS

- INSTRUMENT PANELS
- MACHINE SCREWS
- SUSPENSION COMPONENTS
- INTERIOR COMPONENTS
- DOOR FRAMES & HINGES
- DOOR PANELS & ATTACHMENTS
- SEATS & RESTRAINT SYSTEMS
- ACCESSORIES & ATTACHMENTS
- THREAD-CUTTING SCREWS
- THREAD-FORMING SCREWS
- BODY COMPONENTS & ATTACHMENTS

Phillips supports multiple head-style options in various screw sizes and thread types

PAN HEAD

FLAT HEAD

TRUSS HEAD

FLAT-TOP, ROUNDWASHER HEAD

One drive system with five choices of engagement

The benefits of the **PHILLIPS SQUARE-DRIV[®]** combination drive system are significant. In larger, higher torque applications where stick-fit and off-angle driving are crucial, **PHILLIPS SQUARE-DRIV[®]** is especially useful. Fasteners can be better controlled at higher torque levels for optimum clamp loads. This reduces driver bit wear and eliminates driver cam-out which can cause recess reaming, component damage/rework and operator injury. The stabilizing ribs in the recess and driver bit ensure a class leading stable fit and further help eliminate cam-out.

In field service operations, versatility is the mark of the **PHILLIPS SQUARE-DRIV[®]** combination drive system. A single drive system allows the use of five different drivers: **PHILLIPS SQUARE-DRIV[®]**, **PHILLIPS II[®]**, **POZIDRIV[®]**, Square, and Generic Phillips.

FEATURES

- ✦ Recess to driver fit engineered to ensure screw sticks securely to driver bit
- ✦ **ACR[®]** technology
- ✦ Only three driver bit sizes required to cover the most popular size-range
- ✦ Distinctive head marking that easily identifies a **PHILLIPS SQUARE-DRIV[®]** Drive System
- ✦ Phillips Screw Company quality inspections

BENEFITS

- ✦ Reliable one-handed application of screws at point of assembly
- ✦ Magnetic bits or vacuum screw holders not necessary
- ✦ Virtually eliminates dropped screws in assembly area and on factory floor
- ✦ Significantly enhances driving torque capability
- ✦ Aids in disassembly for more effective maintenance and service
- ✦ Extends driver bit life
- ✦ Assures global system quality and compatibility
